

Technology Should Support Your Business Operations – and Your Bottom Line

Grassi's Technology Consulting professionals help businesses harness the full power of their systems and software to streamline operations, save costs and mitigate risk. Employing the latest advances in automation, artificial intelligence, cybersecurity and more, our experienced advisors help you identify the best technology tools to run your business, protect its digital assets, measure its performance and make confident data-driven decisions.

We offer a full range of Technology Consulting services to improve your resource utilization and protect your bottom line, including:

- Cybersecurity plans and assessments
- Business continuity and disaster recovery
- Privacy & data protection programs
- Technology assessments
- Outsourced CIO services
- IT modernization, including remote-first workspaces
- Employee training on systems and security procedures
- IT audits and process assessments
- Governance, risk & compliance policies and procedures
- Third-party risk management and vendor selection
- Managed services
- System selection and implementation, including enterprise resource planning (ERP)
- Robotic process automation (RPA) and artificial intelligence (AI) tools

Our experienced consultants work effectively alongside your technology providers while explaining our recommendations to you in clear, practical terms and action items. We will be with you every step of the way, leading you to the digital transformation your business needs to manage risk and maintain a competitive edge.

Get the most out of your technology investments with the help of Grassi's Technology Consultants. For more information, please contact:
